MODERATOR: Good afternoon ladies. In our day to day lives, sometimes we ask our friends which soaps or shampoos do they use. Though we are in market research organization, we do not know all the things nor are expert in everything. So, we need to know so many things from the people like you. Basically we collect some information on a product or a topic by discussing with the people. We might get more information from you if you could feel free to express your views more and more so as to enable us getting more information.

Our strange pattern of work is that we have been disturbing people like you by discussing on various products to know their likeness and dislikes on them. What can I do as this is our pattern of work?

As it will be very difficult to note all your valuable responses, if you permit, we will have an audio and video recording of the discussion in order to correctly record all your valuable views, which will help in the changes and development in future. Please share your responses freely without thinking it might be wrong or right. Whichever you like to share, please feel free doing it.
